

Exclusion procedure for illness/infectious diseases

Valuing Compassion, Community, Endurance, Friendship, Hope, Respect, Thankfulness, Wisdom

The Nursery's aim is to provide the best possible care for all of the children. Therefore, we cannot accept sick children at Nursery. In order to avoid embarrassment to parents and staff, please do not try to leave a child in the Nursery if you suspect that they are unwell. When a child becomes ill at the Nursery every effort will be made to contact the parent/carer, who will be requested to collect their child as soon as possible.

During the Covid 19 pandemic, please ensure you are clear about the symptoms of the virus and if your child shows signs of a cough, high temperature, loss of smell and taste, please isolate them immediately until the results of a test have been secured. Help us to keep our community safe.

The most frequently asked question by a parent/ carer is: "My child has got a runny nose, but they are well. Can they come to Nursery?"

What is a well child?

A well child:

- is not reliant on Calpol
- does not have a high temperature
- is well enough to take part in all Nursery activities and experiences
- has a normal appetite (for them) and is happy and sociable
- does not require a greater staff ratio and has normal bowel functions

It is not fair on your child, other children or the staff if you send them to Nursery knowing that they are not well.

Please use the guidelines on the following page before bringing your child to Nursery.

Please notify the Nursery if you are aware that your child has a contagious illness or if a doctor/pharmacist has confirmed the cause of the illness.

The Nursery has an obligation to inform the Environmental Health Department and Ofsted of any child believed to be suffering from a notifiable disease.

Keeping parents/carers informed of illnesses

A list of infectious diseases will be displayed on the notice board.

If more than one child is absent from the Nursery at the same time with the same illness, the Nursery will inform parents/carers by displaying the details on the noticeboard.

Disease/Illness	Exclusion Period
Antibiotics	First two days at home
Temperature	If sent home ill, child must be off for 24 hours
Vomiting/ diarrhoea	48 hours from last episode of diarrhoea or vomiting
